Contents

- Introduction to the course
- Course requirements
- Grading policy
- Materials/Tools/References

Introduction to the course

- Image and video processing with a practical MATLAB-oriented approach
- Part I: Image Processing
 - Overview of the field
 - Fundamental concepts, notation, and terminology
 - MATLAB and Image Processing Toolbox
- Part II: Video Processing
 - Main concepts and terminology
 - Digital video processing techniques

Course requirements

- Follow lessons in classrooms
- Read textbooks at home
- Complete and submit workshops and assignments in time
- Discussing actively in your teams and in classrooms

Grading Policy

- On-going assessment:
 - 01 Assignment: 40%
 - 01 theory presentation: 15%
 - 03 exercises: 30%
 - 01 quiz: 15%
- Final Result: 100%
- Completion Criteria:
Assignment ≥ 4 & Final Result ≥ 5
